

PDS Keeps the Gear and Power Transmission Industries Turning

Manufacturers of brakes and clutches, gears, sprockets, shafts, couplings and power screws can't afford to have crashed or malfunctioning spindles bring their production lines to a grinding halt. That's why they depend on fast, reliable and precise spindle repairs from Precision Drive Systems (PDS) to keep their production running smoothly.

WORK WITH DECADES OF GEAR AND POWER TRANSMISSION MANUFACTURING EXPERIENCE

PDS designs, rebuilds and repairs spindles to support virtually every machine and application for gear and power transmission parts manufacturing. Since 1996, PDS' factory-trained engineers and technicians have successfully repaired more than 40,000 spindles in a wide range of industries to better-than-new standards.

KEEP YOUR PRODUCTION LINES MOVING

PDS provides a wide variety of products and services for the gear and power transmission industries, including:

- > New replacement spindles
- > Spindle repair and rebuild
- > Spindle health monitoring
- > Spindle design and application services for robotics

SPINDLE APPLICATION EXPERTISE WITH A FULL RANGE OF MATERIALS

PDS spindles are engineered to work well with the materials used most often in the gear and power transmission industries, including:

- > Steels
- > Composites
- > Aluminums
- > Plastics

Ask about our industry leading optional 24-Month Warranty and Industry 4.0 Spindle Health Monitoring System.

Contact PDS today to keep turning out high-quality gears and power transmission components with our new spindle replacements and expert spindle repair.
