

PDS Keeps Bearing Production Lines Rolling

Bearing manufacturers understand that inadequate spindle bearing seals can often cause contamination failures that shut down an entire production process. That's why they rely on fast, precise and dependable spindle repairs from Precision Drive Systems (PDS) to deliver the productivity, profitability and performance that the bearings industry revolves around.

TURN TO DECADES OF SPINDLE EXPERIENCE AND SUPPORT

PDS designs, rebuilds and repairs spindles custom engineered to provide the durability, efficiency and dependability that bearing manufacturers demand. Since 1996, PDS' factory-trained engineers and technicians have successfully rebuilt more than 40,000 spindles in a wide range of industries to better-than-new standards.

KEEP YOUR PRODUCTION LINES ROLLING

PDS provides a wide variety of products and services used in the bearings production industry, including:

- > Seal improvements
- > Spindle repair
- > Spindle health monitoring
- > Replacement spindles

SPINDLE EXPERTISE THAT OPTIMIZES YOUR OPERATIONS

PDS spindles are engineered to help maximize the quality and efficiency of the alloy steel used in the bearing production process.

Ask about our industry leading optional 24-Month Warranty and Industry 4.0 Spindle Health Monitoring System.

Contact PDS today to see how our new and rebuilt spindles and expert spindle repair can help your bearing production line turn a stronger profit.
